CONFLICT OF INTEREST PROHIBITION STATEMENT

CMS will not approve projects for which a conflict of interest exists or the appearance of a conflict of interest. Similarly, we will generally not approve uses that commit CMS funding to very long-term projects (greater than three years). By obliging the State to fund a long and large multi-year expense, we consider such projects to raise the appearance of a conflict of interest where the levy of future CMPs could be constructed to be done for the purpose of raising revenue rather than for the statutory purpose of deterring or sanctioning poor quality. We will, however, consider each project in light of the specifics of each individual case.

ATTESTATION STATEMENT

CMP funds have been provided for the express purpose of enhancing quality of care and quality of life in nursing homes certified to participate in Title 18 and Title 19 of Social Security Act. Failure to use civil money penalty funds solely for certified nursing homes and for the intended purpose of the grant proposal is prohibited by Federal law. Failure to use the CMP funds as specified will result in denial of future grant applications and referral to the appropriate entity for Medicare/Medicaid fraud and Program Integrity. The applicant shall disclose any conflicts of interest, including family relationships.
